

**Board of County Commissioners
Agenda Request**

Date of Meeting: June 2, 2015

Date Submitted: May 18, 2015

To: Honorable Chairperson and Members of the Board

From: Robert M. Presnell, County Administrator
Clyde Collins, Building Official

Subject: Board Approval to Repair and Replace Electronic Locks at the Edward J. Butler Governmental Complex

State of Issue

This agenda item seeks Board approval to repair and replace the outdated electronic locks at the Edward J. Butler Governmental Complex.

Background

The locks at the Edward J. Butler Governmental Complex are in need of an electronic upgrade. The company that installed and maintained the locks is out of business and the locks are basically obsolete. The Building is currently opened and closed manually.

Analysis

Staff solicited quotes from qualified providers for the replacement of the electronic locking system. Since Sonitrol currently provides monitoring and intrusion services at other County buildings, it is recommended for Sonitrol to replace and upgrade the electronic locking system at the Edward J. Butler Governmental Complex.

Fiscal Impact

The Gadsden County Facilities and Maintenance Department will pay for the replacement and upgrade to the electronic locking system at the Edward J. Butler Governmental Complex at a cost of \$665.00 and a \$60.00 monthly monitoring fee. These funds will be allocated from the Facilities Maintenance Department (0031); Repair/Maintenance Account (54600).

Options

1. Approve the replacement of the electronic locking system at the Edward J. Butler Governmental Complex and allow Chairperson to sign the contract once it is submitted.
2. Do not approve the replacement of electronic locking system.
3. Board Direction.

County Administrator's Recommendation

Option 1

SCOPE OF WORK FOR Gadsden County FL

This proposal presented by Tyco is being provided at the request of Gadsden County FL to successfully meet the specifications of the Gadsden County Access Project at the 9-B E Jefferson St, Quincy, FL 32353 location.

We propose to install and maintain a Access system which will consist of the following:

| | |
|--|--|
| Contact Information: | Mr. Warren Ellis |
| System Operation: | This proposal is to take over an existing access control system. Tyco will be installing a new KT-400MAC panel that will be connected to Kantech access control software via a standard internet connection. Customer has three doors with locks with one of the doors having a card reader. |
| Programming Info: | Access control software will need to be programmed to match the customer's existing security settings. |
| Site Conditions: | Existing building. |
| Existing Equipment: | All of the existing equipment is listed in the parts list. |
| Customer Expectations: | Install to take place during normal operational hours as coordinated with the customer. |
| Training Expectations: | Customer will be trained on all access control software and equipment. |
| Customer Responsibilities / Tyco Exclusions: | Customer will need to provide a standard internet connection for panel to software communication. |
| Documentation Needs: | All manuals will be provided at the completion of install. |
